TECHNICAL SKILLS

Languages	Java, Python, JavaScript, TypeScript, SQL, HTML5, CSS3.
Backend / APIs	RESTful API Design, Flask, Spring Boot, Node.js, Microservices, OOP, Algorithm Design, Postman, OpenAPI.
Databases	PostgreSQL, MySQL, MongoDB, SQL Server, Schema Design.
Front-End / UX	React, Vanilla JS, Responsive Design, CSS Variables, Component UI, WCAG Accessibility, Figma.
Tools	Git, GitHub, GitHub Actions, CI/CD, Linux, Agile/Scrum, Unit Testing, Functional Testing, Debugging.
Cloud	AWS, Docker, Cloud-Native Architecture, Distributed Systems, NLP, LLM APIs.

EDUCATION

B.S. Computer Science · **University of the District of Columbia** · Washington, DC May 2026

- Coursework: Software Engineering, Operating Systems, Data Structures, Algorithm Design, Computer Networks

A.S. Digital Media & Web Technology · **Montgomery College** · Rockville, MD Dec 2022

- Built responsive web apps applying mobile-first design, WCAG accessibility standards, and user-centered principles

PROJECT EXPERIENCE

TrueScope: AI Fact-Checking Web Application · **Capstone · UDC** 2025–2026

- Architected a Python/Flask backend integrating 3 external REST APIs and LLM services to retrieve, validate, and classify user claims in real time, served to 10+ live demo users; implemented modular architecture, robust error handling, and OOP best practices that reduced debugging time across sprints
- Led frontend development in a 4-person Agile/Scrum team. Authored technical design docs, managed feature branches and code reviews via Git/GitHub, wrote 10+ unit and functional test cases covering edge cases and failure conditions, and delivered a fully accessible JavaScript UI across a 2-semester capstone cycle

Full-Stack Application Development · **Academic Team Project · UDC** 2024–2025

- Collaborated in a 4–5-person team to build a full-stack application end-to-end over a 16-week semester. Developed responsive HTML/CSS/JS frontend components, Java and Python backend services, and a SQL data layer using OOP and modular architecture; wrote unit and smoke tests across the full stack
- Designed relational database schemas supporting 5+ entities, wrote optimized SQL queries that improved data retrieval performance, and integrated a scalable data layer with backend services — applied system design principles to ensure reliability and delivered all milestones on schedule across 4 Agile sprints

ADDITIONAL

Languages: English (fluent), Spanish (native).
