

Diana Martinez

Washington, DC · 202-250-0258 · dianam7319@gmail.com · [LinkedIn](#) · [Portfolio](#) · [GitHub](#)

TECHNICAL SKILLS

Languages	Python, JavaScript, TypeScript, Java, SQL, HTML5, CSS3.
Backend / APIs	Flask, FastAPI, RESTful API Design, Spring Boot, Node.js, Microservices, OOP, Algorithm Design, Postman, OpenAPI.
AI / LLM	Gemini API (text + vision), fact-check grounding, hallucination mitigation, prompt engineering, AI-assisted & agent-driven development (Claude, GitHub Copilot).
Databases	PostgreSQL, MySQL, MongoDB, SQL Server, Schema Design, Query Optimization.
Front-End / UX	React, Responsive Design, CSS Variables, Component UI, WCAG Accessibility, Figma.
Tools & Cloud	Git, GitHub, GitHub Actions CI/CD, Docker, Docker Compose, AWS, Linux, pytest, JUnit 5, Agile/Scrum.

EDUCATION

- B.S. Computer Science · University of the District of Columbia · Washington, DC** May 2026
- **Magna Cum Laude**
 - Coursework: Software Engineering, Operating Systems, Data Structures, Algorithm Design, Databases, Computer Networks
- A.S. Digital Media & Web Technology · Montgomery College · Rockville, MD** Dec 2022
- Built responsive web apps applying mobile-first design, WCAG accessibility standards, and user-centered principles

PROJECT EXPERIENCE

- TrueScope: AI Fact-Checking Web Application · Capstone · UDC** 2025–2026
- Architected a **Python (FastAPI)** backend integrating the Google Fact Check Tools API and **Gemini (text + vision)** to retrieve, validate, and classify claims in real time — applying **fact-check grounding** to anchor AI verdicts in retrieved evidence and reduce **hallucination risk**; extended to **multimodal fact-checking** of images and video transcripts; served to 10+ live demo users
 - My role in the 4-person Agile/Scrum team: led frontend development (**React + TypeScript**), authored technical design docs, managed feature branches and code reviews via Git/GitHub, and wrote 10+ unit and functional tests covering edge cases and failure conditions
- Claims Dashboard: Full-Stack Pharmacy Claims Application · Solo Project** 2026
- Built a full-stack pharmacy claims dashboard — **React 18** frontend, **Python/Flask REST API** backend — with claim submission, filtering, analytics, and automated **fraud detection** flagging high-value and duplicate claims; containerized with **Docker Compose** with separate **GitHub Actions CI** pipelines per tier (github.com/DianaM12-2/Pharmacy-claims)
- FactCheck AI API: Claims + AI Fact-Checking REST API · Solo Project** 2026
- Built a production-style **Flask 3** REST API combining claims CRUD and fraud detection with **Gemini-powered fact-checking** (single and batch); OOP architecture with dataclasses and type hints, **11 pytest** unit/integration tests, Docker, and GitHub Actions CI (github.com/DianaM12-2/FactCheck-AI-API)
- Pharmacy Analytics Pipeline · Solo Project** 2026
- Built a claims analytics pipeline (**Python, SQL, pandas**) running 6 analytical queries (CTEs, aggregations) with 4 cost/utilization visualizations; logic validated with **pytest** in GitHub Actions CI (github.com/DianaM12-2/Pharmacy-Analytics)

ADDITIONAL

Apple Pathways Alliance — Accepted into Apple's early-career program supporting underrepresented students in tech.

Languages: English (fluent), Spanish (native).
